

RAG Ingestion:

Ingested the testcase file to Mongo DB

Retrieving Admin, AHC and Emergency testcases

Limited to 50 testcases results.

The screenshot displays the MongoDB Atlas Playground interface. On the left, a workflow diagram shows the process: Ingest Data (grey circle) -> Search Query (blue circle) -> Embedding (green circle). The Search Query step is active, showing the query 'Admin, AHC and Emergency testca' in a text box. Below the workflow, the 'Search Results' section is visible, showing a red error icon. On the right, the 'MongoDB Atlas' configuration panel is shown, titled 'MongoDB Atlas' with ID 'ifRvY'. It includes a description 'MongoDB Atlas Vector Store with search capabilities'. The configuration settings are as follows:

- Enable mTLS***: Toggle switch is off.
- Cache Vector Store**: Toggle switch is on.
- Insert Mode**: Dropdown menu is set to 'append'.
- Number of Results**: Input field is set to '50'.
- Index Field***: Text box contains 'embedding'.
- Filter Field**: Text box contains 'Type something...'.

Component Output
